How to print on dymo labelwriter 4xl

Modified on: Wed, 27 Oct, 2021 at 4:14 PM First, you'll need to download and install Dymo's printer driver from their web-site. Then, open the label you want to print in the mac Preview application. To open the print dialog, select File > Print. From the print menu, select "Show Details" to see more printing options. Select the correct paper size. You want the "4 in x 6 in" inch option from the dropdown. Click "Print" to complete this process. Need to print 4"x6" Dymo labels in Windows? Check out this article. Did you find it helpful? Yes No Send feedback Sorry we couldn't be helpful. Help us improve this article with your feedback. LabelWriter 4XL Thermal Label Printer DYMO now offers 4" wide label printing with the DYMO LabelWriter 4XL label printer. The easy and cost effective way to print a wide range of professional quality labels. Offering 300dpi quality, fast print speeds and a sleek, compact design, this 4" label printer delivers terrific results at a great value. Plus, the economic direct thermal technology means the only supplies you'll need are the labels. No ink No toner, No wasted time. The DYMO LabelWriter 4XL label printer prints on a wide variety of labels for many applications, from office to commercial environments including shipping and receiving, inventory control, retail, health care and transportation and logistics. Modified on: Wed, 27 Oct, 2021 at 4:11 PM This article will show you how to print 4x6 labels on your Dymo 4XL printer in Windows. Print 4"x6" labels Download Dymo's printer driver from their website. Find the downloaded file and install the printer drivers. Once the drivers are installed, right click on your downloaded label, and click "Print" from the menu. From the Print menu, make sure to select your Dymo 4XL printer, and "4 in x 6 in" for the paper size. Then hit the Print button to print your label. Need to print Dymo labels in MacOS? Follow the steps in this guide. Did you find it helpful? Yes No Send feedback Sorry we couldn't be helpful. Help us improve this article with your feedback. (updated 3/4/2020) If you experience print quality issues on your DYMO LabelWriter 4XL, you can perform a printer self-test. It's an easy process to carry out, and the self-test verifies that all elements of the print head and printing mechanism are in proper working condition. Note: Some users print a self-test from time to time just to check that everything is in order, even if they don't notice any issues with the printer output or print quality. To perform a self-test for the DYMO 4XL printer : 1. With a roll of labels in the Dymo 4XL printer, press and hold the form-feed button on the front of the printer for five to ten seconds. The printer begins printing vertical lines along the width of the printer. The test pattern automatically changes every 3/4 inch (19 mm). 2. Once the self-test begins, release the form-feed button. 3. To stop the self-test, press and release the form-feed button. If you used the self-test feature because you do have a print problem, please keep the printout as you may need to scan it or fax it to Dymo tech support. If you used the self-test feature just because you wanted to check the 'health' of your printer, you might want to write the date on it and keep it for future reference. Labelcity stocks the entire range of Dymo LabelWriter Labels and for your shopping convenience we've created a separate category for Dymo 4XL Labels (Write a Review) I receive everything included in the ad, and love these items!! Setup was very easy, including the printer download on my windows 10 version! We use this for printing shipping labels as well as using it to create labels for box contents. Never had an issue and now we are purchasing a second one. easy to set up and works great! I am online seller and I have this as my main printer for almost a year now and it has been life-changing! I used to print the old fashioned way using an inkjet printer on regular white paper, my sales are mostly from Poshmark and the way they setup their label format makes it so that there's a lot of wasted space on the paper and I feel guilty cutting away the excess, then I'd have to tape it and worry about it getting wet if it rains or snows while the package is in transit. As my business grew and started printing a lot of labels the replacement ink cost has skyrocketed and I researched on alternatives then I found out about thermal printers and DYMO 4XL came highly recommended. Now fast forward into almost a year and the savings are immense! No more cost of paper, tape, ink! And the labels are soooo professional looking! So am buying another one for my sister who is also a seller. Amazing product. It is a good tool for online sellers. Related articles This guide will show you how to install and configure default settings of a DYMO LabelWriter 4XL Thermal Printer on Windows in just a few steps. You can then easily print 4" x 6" FedEx, UPS, DHL (or other carriers) with a DYMO LabelWriter 4XL Thermal Printer at Postmen. Install DYMO LabelWriter 4XL Thermal Printer on Windows Disconnect your thermal printer Install DYMO driver at the official website. Make sure you select the right model to find the correct driver. Connect back your DYMO LabelWriter printer via USB, and your computer will automatically match this printer to the downloaded driver. Configure default settings of a DYMO LabelWriter 4XL Printer on Windows Go to your computer's Control Panel > View Devices & Printers > Right click your thermal printer > Click Printing Preferences Set orientation as Portrait on the Printing Preferences popup. Click Advanced > Set Paper Size to 1744907 4 in x 6 and set Print Quality to Barcodes and Graphics > click OK. Click on Apply and Ok. Updated on: 03 / 02 / 2021
